ACTA

Author Index

Acree, Jr., W.E., see Pandey, S. 155
Albajez, R., see Marcos, S.d. 117
Alder, J.F., see Benmakroha, F. 215
Anzalone, S.
—, Bottari, E. and Festa, M.R.
Determination of oligoelements in wheat 241
Auffret, F., see Burgot, G. 125

Bachas, L.G., see Palet, C. 287
Benmakroha, F.
— and Alder, J.F.
Toward development of a humidity correction algorithmfor surface acoustic wave sensors. Part 4. The effect of coating mass, relative humidity and temperature on the isosteric heat of adsorption of benzene, toluene, 2-nitrotoluene and 2,4-dinitrotoluene onto platinum/lead-coated piezoelectric crystals 215
Björklund, L.B.
— and Morrison, G.M.
Determination of copper speciation in freshwater samples through SPE–spectrophotometry 259
Borissevitch, I.E.
—, Tominaga, T.T., Imasato, H. and Tabak, M.
Resonance light scattering study of aggregation of two water soluble porphyrins due to their interaction with bovine serum albumin 281
Bosner, B., see Cimerman, Z. 145
Bottari, E., see Anzalone, S. 241
Bruland, K.W., see Miller, L.A. 161
Bulatov, V.
—, Gridin, V.V., Polyak, F. and Schechter, I.
Application of pulsed laser methods to in situ probing of highway originated pollutants 93
Bunker, C.E., see Sun, Y.-P. 159
Burgot, G.
—, Auffret, F. and Burgot, J.-L.
Determination of acetaminophen by thermometric titrimetry 125
Burgot, J.-L., see Burgot, G. 125

Cai, C.-S.
— and Xue, K.-H.
Electrocatalysis of NADH oxidation with electropolymerized films of nile blue A 69
Castillo, J.R., see Marcos, S.d. 117
Cheng, C.-P., see Huang, S.-D. 101
Cimerman, Z.
—, Galic, N. and Bosner, B.
The Schiff bases of salicylaldehyde and aminopyridines as highly sensitive analytical reagents 145
Cimerman, Z., see Galić, N. 135
Ciszewski, A.
—, Wasiak, W. and Ciszewska, W.
Hair analysis. Part 2. Differential pulse anodic stripping voltammetric determination of thallium in human hair samples of persons in permanent contact with lead in their workplace 225
Ciszewska, W., see Ciszewski, A. 225
Correia dos Santos, M.M., see Lopes da Conceição, A.C. 191
Cynkowski, T., see Palet, C. 287

Daunert, S., see Palet, C. 287
Doblhoff-Dier, O., see Matsui, J. 1

Festa, M.R., see Anzalone, S. 241

Galbán, J., see Marcos, S.d. 117
Galić, N.
—, Cimerman, Z. and Tomišić
Tautomeric and protonation equilibria of Schiff bases of salicylaldehyde with aminopyridines 135
Galic, N., see Cimerman, Z. 145
Gao, Z.
—, Siow, K.S., Ng, A. and Zhang, Y.
Determination of ascorbic acid in a mixture of ascorbic acid and uric acid at a chemically modified electrode 49
Gridin, V.V., see Bulatov, V. 93
Guo, X.-Q.
—, Zhao, Y.-B. and Xu, J.-G.
Study on sensitized photochemical fluorescence of menadione sodium bisulfite and its application in pharmaceutics analysis 109
Hansen, E.H., see Nielsen, S. 5
Hayakawa, K., see Murahashi, T. 251
Higson, S., see Reddy, S.M. 59
Hirokawa, K., see Wagatsuma, K. 267
Hisamoto, H., see Kim, K. 199
Huang, S.-D.
—, Cheng, C.-P. and Sung, Y.-H.
Determination of benzene derivatives in water by solid-phase microextraction 101

Imasaka, T., see Matsumoto, J. 129
Imasato, H., see Borissevitch, I.E. 281
Inukai, Y.
—, Kaida, Y. and Yasuda, S.
Selective adsorbents for germanium(IV) derived from chitosan 275

Jin, W.
— and Wang, Y.
Capillary zone electrophoresis with end-column amperometric detection for the determination of glutathione at a gold/mercury amalgam microelectrode without deoxygenation 231

Kaida, Y., see Inukai, Y. 275
Kang, S., see Kim, K. 199
Karlberg, B., see Tryzell, R. 183
Katsu, T.
— and Mori, Y.
Determination of free disopyramide in blood serum in situ using a disopyramide-sensitive membrane electrode 79
Kim, K.
—, Minamitani, H., Hisamoto, H., Suzuki, K. and Kang, S.
Active optical thin-film waveguide sensor for ion sensing 199
Kumagai, M., see Nomura, T. 209
Kuwabara, T., see Wagatsuma, K. 267

Lau, O.-W.
— and Shao, B.
Correction for the effects of viscoelastic changes in a piezoelectric quartz crystal by the multiple linear regression method 85
Lawsonm G.E., see Sun, Y.-P. 159
Lin, C.-H., see Matsumoto, J. 129
Liu, J.
Flow injection determination of anionic surfactants based on the solvatochromism of *p*-diphenylaminoazobenzene sulfonate 33
Lopes da da Conceição, A.C.
—, Tena, M.T., Correia dos Santos, M.M., Simões Gonçalves, M.L. and Luque de Castro, M.D.
Flow injection-assisted optical sensor for determination of iron(II) and iron(III) in natural water 191
Luque de Castro, M.D., see Lopes da Conceição, A.C. 191

Ma, B., see Sun, Y.-P. 159
Marcos, S.d.
—, Galbán, J., Albajez, R. and Castillo, J.R.
Enzymatic determination of ethanol based on the intrinsic fluorescence of alcohol dehydrogenase 117
Martínez-Soria, M.T., see Sanz-Asensio, J. 39
Matsui, J.
—, Doblhoff-Dier, O. and Takeuchi, T.
2-(Trifluoromethyl)acrylic acid: a novel functional monomer in non-covalent molecular imprinting 1
Matsumoto, J.
—, Lin, C.-H. and Imasaka, T.
Supersonic jet multiphoton ionization mass spectrometry using nanosecond and femtosecond pulse lasers 129

Miller, L.A.
— and Bruland, K.W.
Competitive equilibration techniques for determining transition metal speciation in natural waters: Evaluation using model data 161
Minamitani, H., see Kim, K. 199
Mori, Y., see Katsu, T. 79
Morrison, G.M., see Björklund, L.B. 259
Muñoz, M., see Palet, C. 287
Murahashi, T.
— and Hayakawa, K.
A sensitive method for the determination of 6-nitrochrysene,2-nitro-fluoranthene and 1-, 2- and 4-nitropyrenes in airborne particulates using high-performance liquid chromatography with chemiluminescence detection 251

Ng, A., see Gao, Z. 49
Nielsen, S.
— and Hansen, E.H.
Determination of As(III) and As(V) by flow injection-hydride generation-atomic absorption spectrometry via on-line reduction of As(V) by KI 5
Nilsson, N.H., see Simpson, S.L. 19
Nomura, T.
—, Kumagai, M. and Sato, A.
Adsorptive determination of copper(II) in solution as its *N,N*-diethyldithiocarbamate on an electrode-separated piezoelectric quartz crystal 209

Palet, C.
—, Muñoz, M., Valiente , M., Cynkowski, T., Daunert, S. and Bachas, L.G.
Selective membrane transport of dicarboxylic acids in their neutral form by a synthetic receptor containing amidopyridine groups 287
Pérez-Clavijo, M., see Sanz-Asensio, J. 39
Pandey, S.
— and Acree, Jr., W.E.
Comments concerning "Effects of photochemical reactions of pyrene in alcohol and aqueous solvent systems on spectroscopic analyses" 155
Polyak, F., see Bulatov, V. 93
Powell, K.J., see Simpson, S.L. 19

Reddy, S.M.
—, Higson, S.P. and Vadgama, P.M.
Amperometric enzyme electrode for the determination of urine oxalate 59
Rollins, H.W., see Sun, Y.-P. 159

Sanz-Asensio, J.
—, Pérez-Clavijo, M. and Martínez-Soria, M.T.
Determination of dimethylarsinic acid by hydride generation gas phase molecular absorption spectrometry 39
Sato, A., see Nomura, T. 209
Schechter, I., see Bulatov, V. 93
Shao, B., see Lau, O. 85
Simões Gonçalves, M.L., see Lopes da Conceição, A.C. 191

Simpson, S.L.
—, Powell, K.J. and Nilsson, N.H.S.
Flow injection determination of Al^{3+} and $Al_{13}O_4(OH)_{24}(H_2O)^{7+}{}_{12}$ species using a 1.3-s reaction with 8-quinolinol-derivatised Fractogel 19
Siow, K.S., see Gao, Z. 49
Sun, Y.-P.
—, Ma, B., Lawson, G..E., Bunker, C.E. and Rollins, H.W.
A response to the comments of S. Pandey and W.E. Acree, Jr. on "Effects of photochemical reactions of pyrene in alcohol and aqueous solvent systems on spectroscopic analyses" 159
Sung, Y.-H., see Huang, S.-D. 101
Suzuki, K., see Kim, K. 199

Tabak, M., see Borissevitch, I.E. 281
Takeuchi, T., see Matsui, J. 1
Tena, M.T., see da Conceição, A.C.L. 191
Tomišić, V., see Galić, N. 135
Tominaga, T.T., see Borissevitch, I.E. 281
Tryzell, R.
— and Karlberg, B.
Calibration methods for determination of ammonium and excess acid in Kjeldahl digests by flow injection analysis 183

Vadgama, P.M., see Reddy, S.M. 59
Valiente, M., see Palet, C. 287

Wagatsuma, K.
—, Kuwabara, T. and Hirokawa, K.
Selection of self-absorption free analytical lines of aluminum in glow discharge optical emission spectrometry 267
Wang, Y., see Jin, W. 231
Wasiak, W., see Ciszewski, A. 225

Xu, J.-G., see Guo, X.-Q. 109
Xue, K.-H., see Cai, C.-X. 69

Yasuda, S., see Inukai, Y. 275

Zhang, Y., see Gao, Z. 49
Zhao, Y., see Guo, X. 109
